

PROJECT CIVILCAM: The 2026 Playoff Intelligence Dossier

Classification:

CONFIDENTIAL BRIEFING

Prepared For:

Venue Operations & Public Safety Command

Subject:

Transforming Civilian Perspectives into
Verifiable Security Assets

Date:

Post-2026 Championship Analysis

19,392 Days of Waiting.

- 15 wins in 16 games.
- A historic Game 5 comeback over the Spurs.
- Bedlam on Broadway as the city celebrated a working-class victory.

**"Please be safe.
Don't get hurt,
don't hurt anybody."**

— James Dolan,
Knicks Owner

One Week of Chaos.

Mayhem breaks out...
Exuberant celebrations marred
by violence.

The 2026 Escalation Timeline

DATA CARD 1

June 8 (Game 3 Loss)

- Brawls erupt outside MSG and at the Bryant Park watch party.
- Traffic blocked; objects thrown at police.

DATA CARD 2

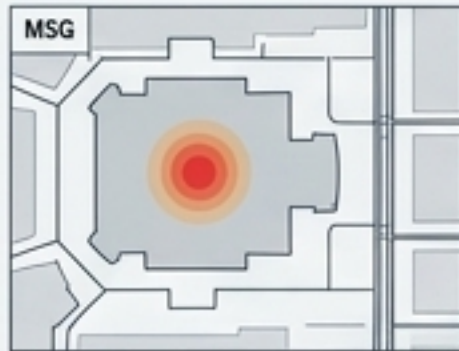

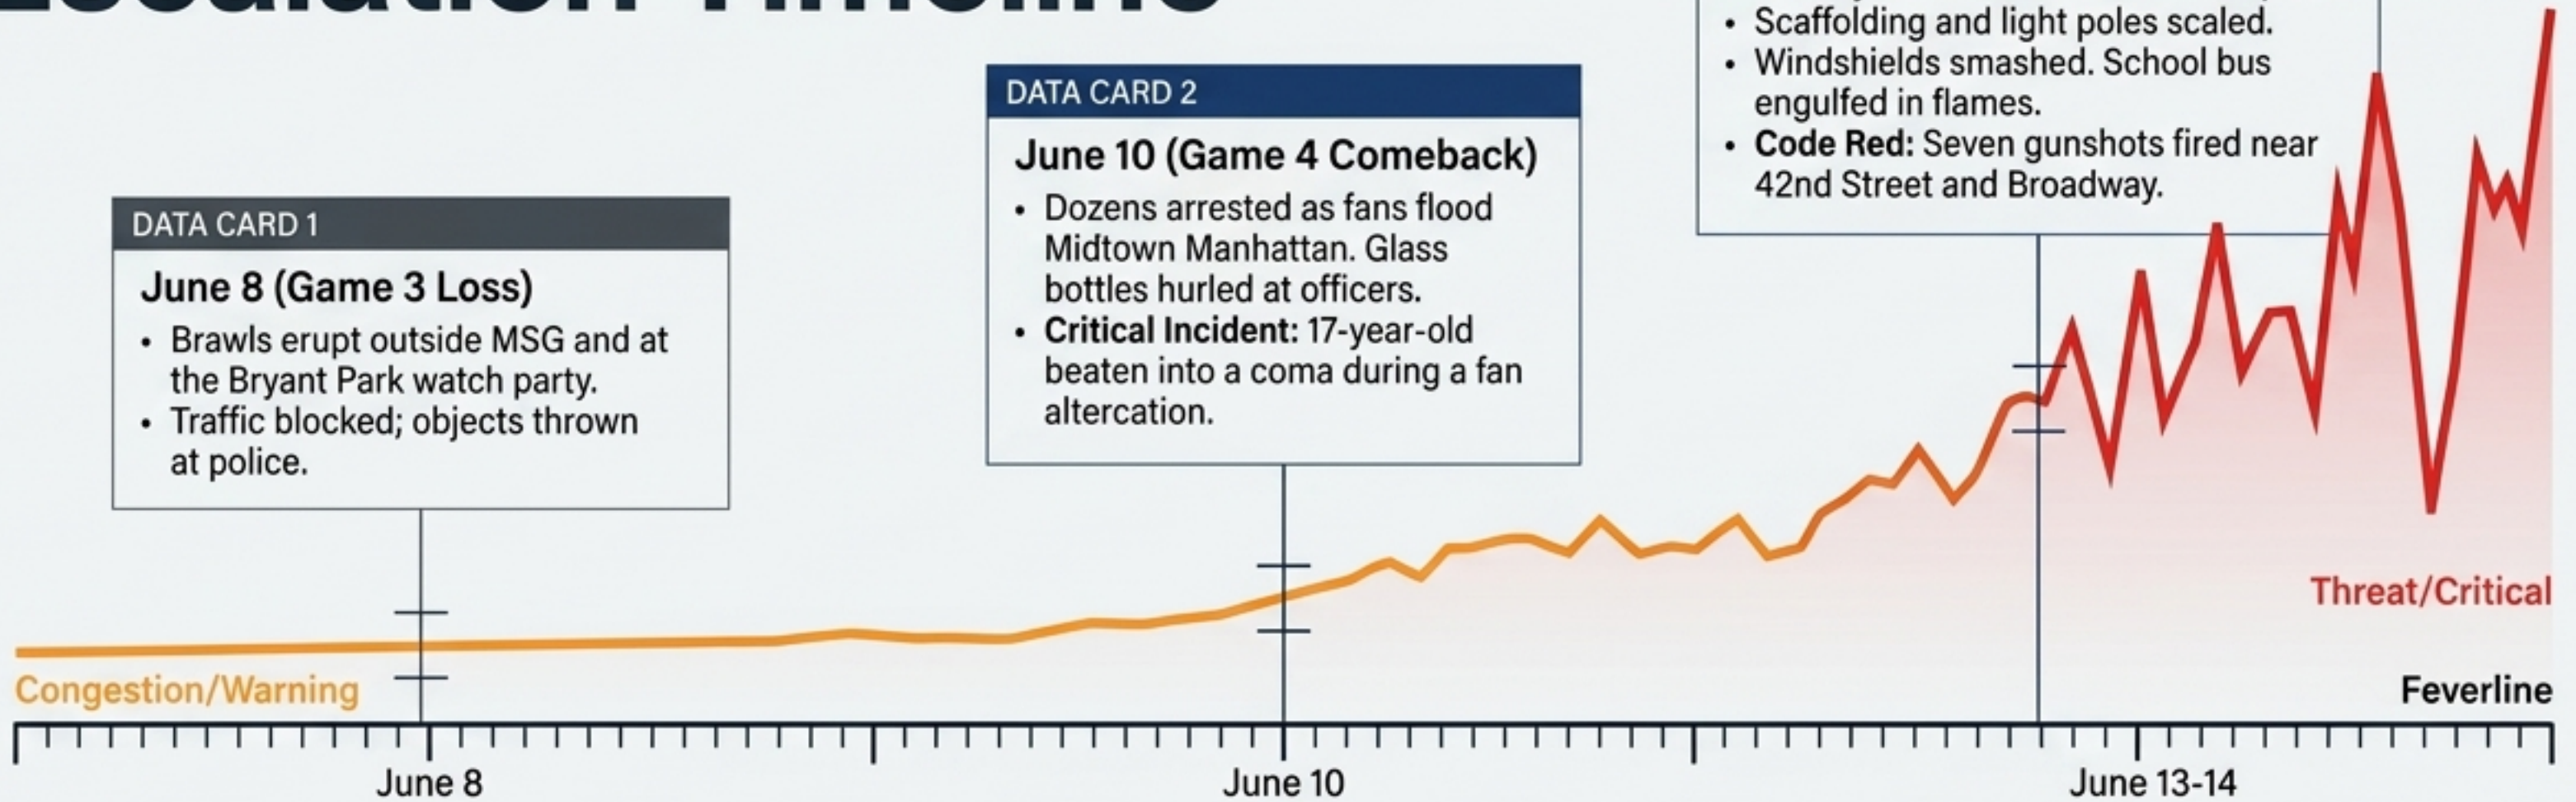

June 10 (Game 4 Comeback)

- Dozens arrested as fans flood Midtown Manhattan. Glass bottles hurled at officers.
- **Critical Incident:** 17-year-old beaten into a coma during a fan altercation.

DATA CARD 3

June 13-14 (Championship Night)

- Total system overload in Times Square.
- Scaffolding and light poles scaled.
- Windshields smashed. School bus engulfed in flames.
- **Code Red:** Seven gunshots fired near 42nd Street and Broadway.

The Security Blindspot Matrix

Modern venues have cameras. What they lack is context.

	Traditional Security	CivilCamAI Intelligence
Field of View	Fixed, limited perimeter angles.	✓ 360° omnipresent coverage.
Perspective	Top-down, detached surveillance.	✓ Ground-level, immediate context.
Asset Trust	Vulnerable to deepfakes and manipulation.	🔒 Cryptographically sealed and verified.
Operational Mode	Reactive review after an incident.	⚠️ Proactive, real-time alerts.

20,000 Unused Sensors in Every Arena

What is the first thing people do in an event situation?

They pull out their cell phone and start recording.

It's natural. It's universal. It's instant. It's powerful.

The goal is not to stop this behavior, but to harness it. CivilCamAI turns everyday recordings into trusted, validated digital evidence.

 **CivilCamAI™**
Powered by Praxidolix Labs

WHAT'S THE **FIRST THING** PEOPLE DO IN AN EVENT **SITUATION?**

ANSWER:
THEY PULL OUT THEIR CELL PHONE AND START RECORDING.

 IT'S NATURAL

 IT'S UNIVERSAL

 IT'S INSTANT

 IT'S POWERFUL

 **CIVILCAMAI™** TURNS EVERYDAY RECORDINGS INTO **TRUSTED, VALIDATED DIGITAL EVIDENCE.**

What If Madison Square Garden Deployed CivilCamAI?

The Simulation:

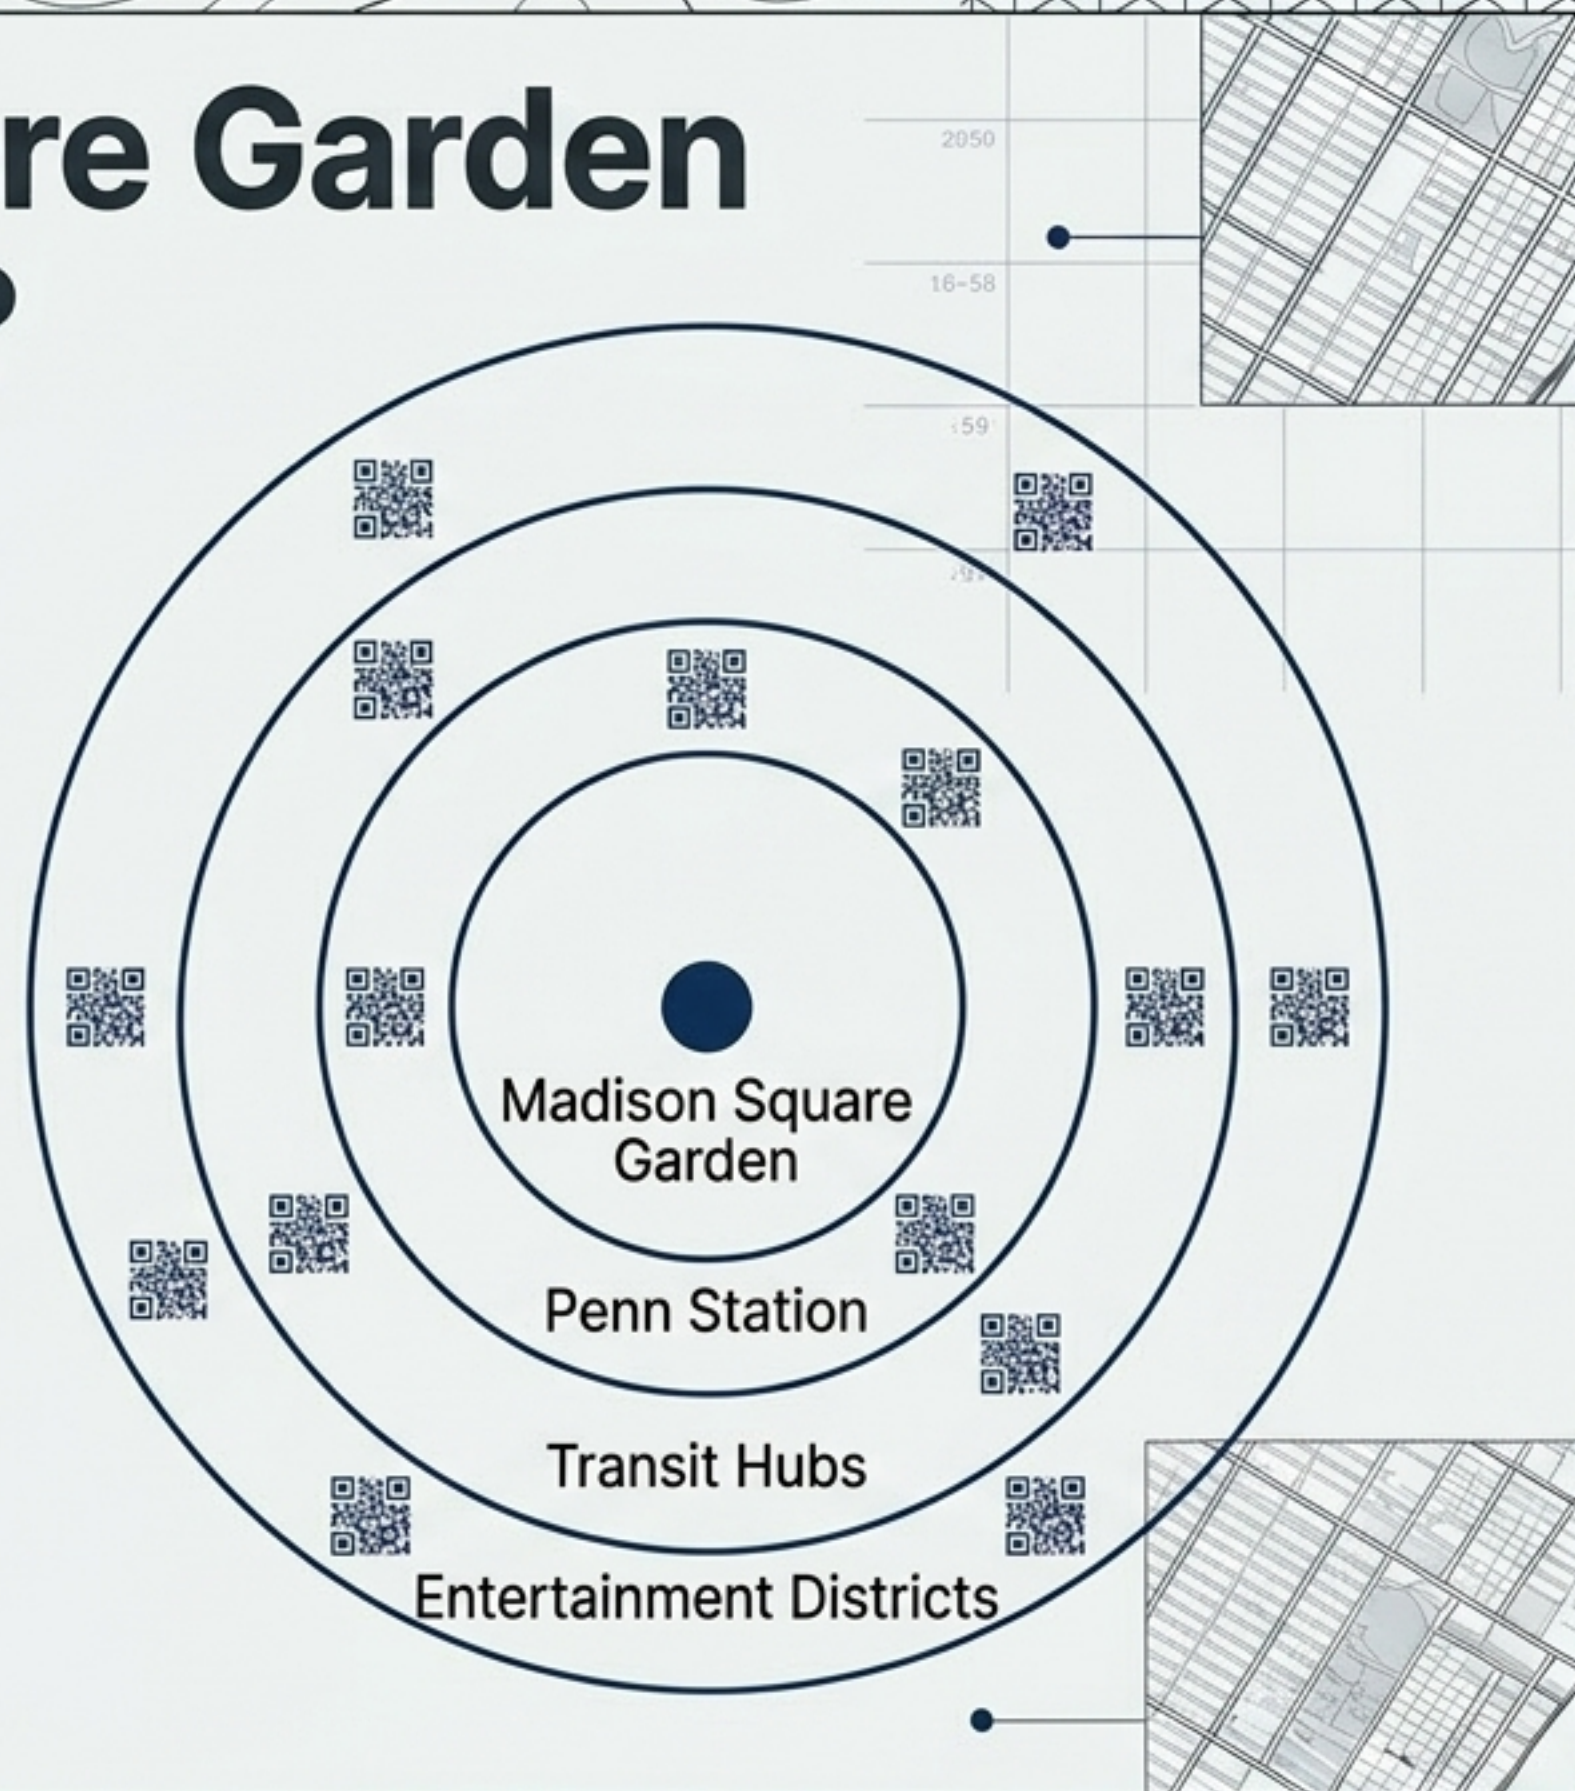

A stress-test of the CivilCamAI platform across the entire 2026 Playoffs.

The Deployment:

Voluntary event intelligence registration via QR codes displayed throughout the MSG complex and surrounding zones.

The Objectives:

- Improve fan awareness and public safety.
- Collect validated, civilian-contributed media.
- Accelerate incident investigations.
- Create a historical intelligence record.

Real-Time Situational Awareness

Live Situational Map:
Tracking active contributors and crowd density in real-time across the MSG complex and Penn Station.

CIVILCAM AI v3.6.0

CHAIN OF CUSTODY - ENCRYPTED - VERIFIED

POWERED BY CIVILCAM AI

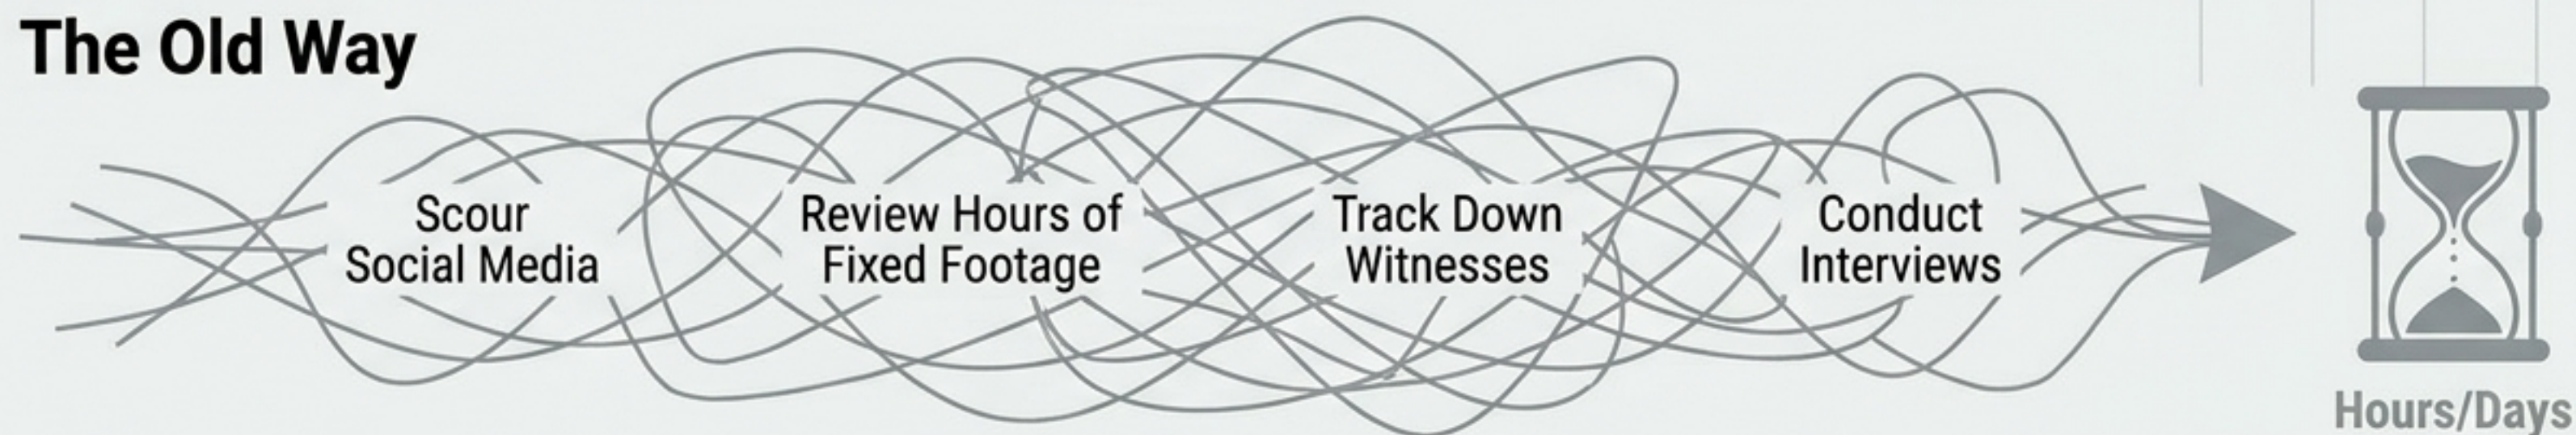

Live Alerts Engine:
Continuous analysis elevating emerging safety concerns—identifying bottlenecks, long wait lines, and elevated crowd tension before they become operational failures.

Live Media Wall: 3,420 videos and 6,100 photos flowing into a centralized, searchable intelligence feed.

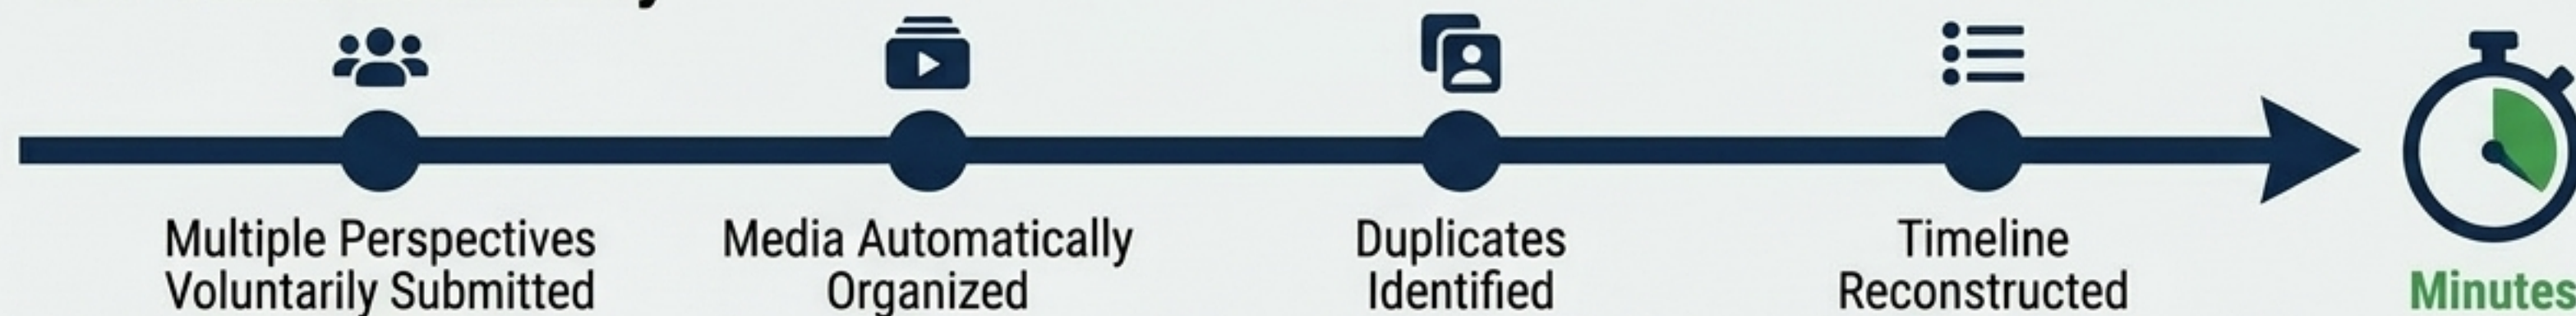

The Incident Resolution Funnel

Case Study: A multi-person altercation occurs in the upper concourse. Instead of a blind spot, venue operators receive an **immediate, multi-angle timeline reconstructed in a fraction** of the traditional time.

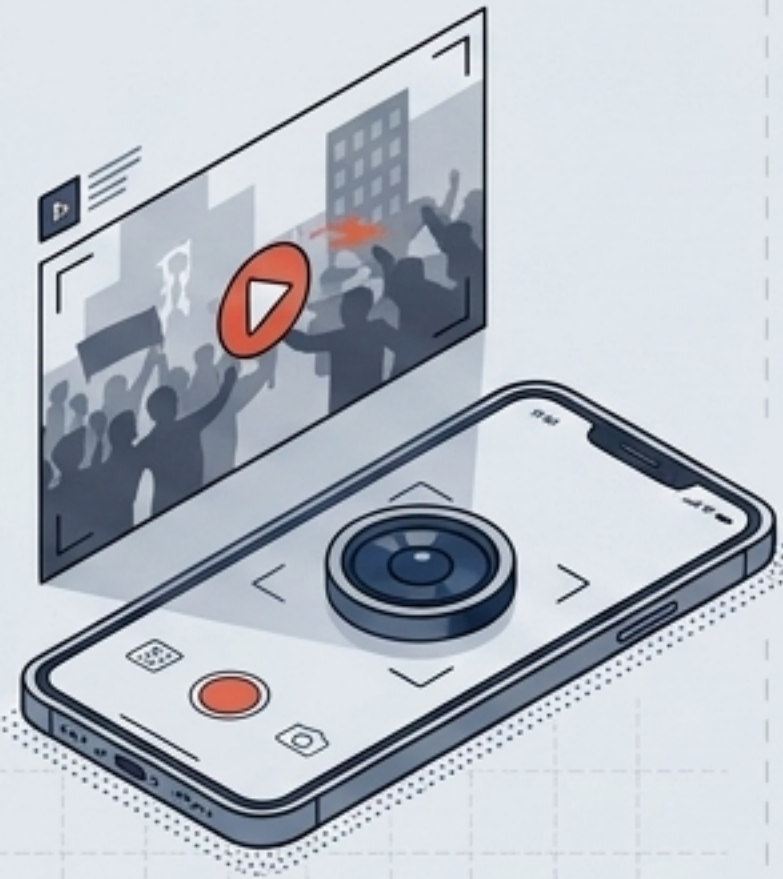

The Old Way

The CivilCamAI Way

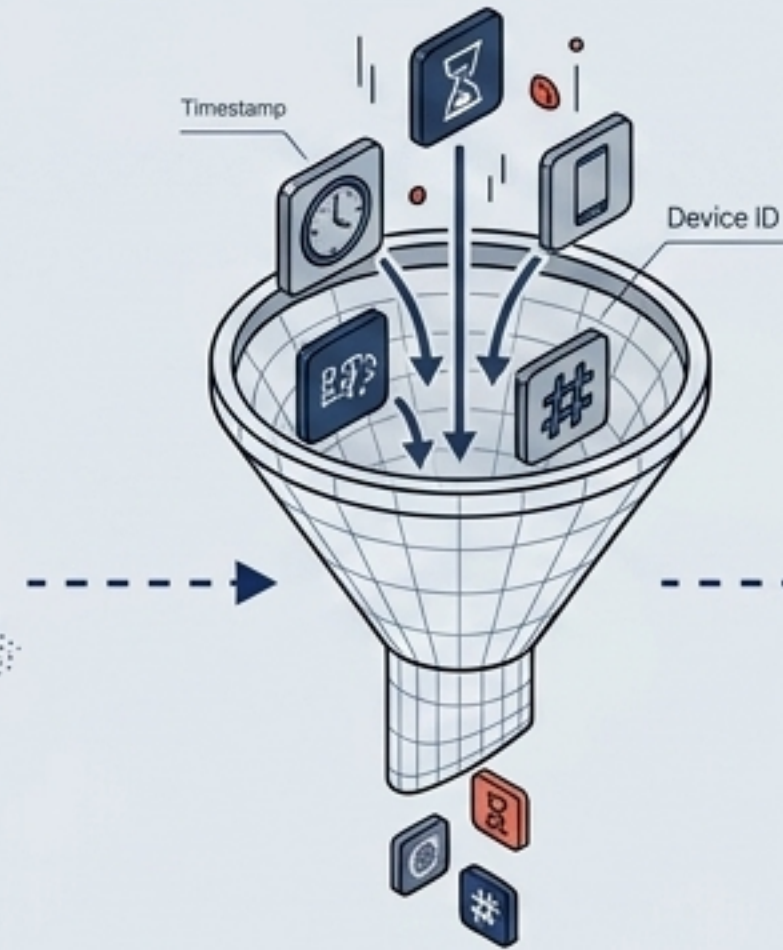

The CivilSeal™ Validation Flow

Step 1: Raw Submission.

Fan captures ground-level footage of a developing incident.

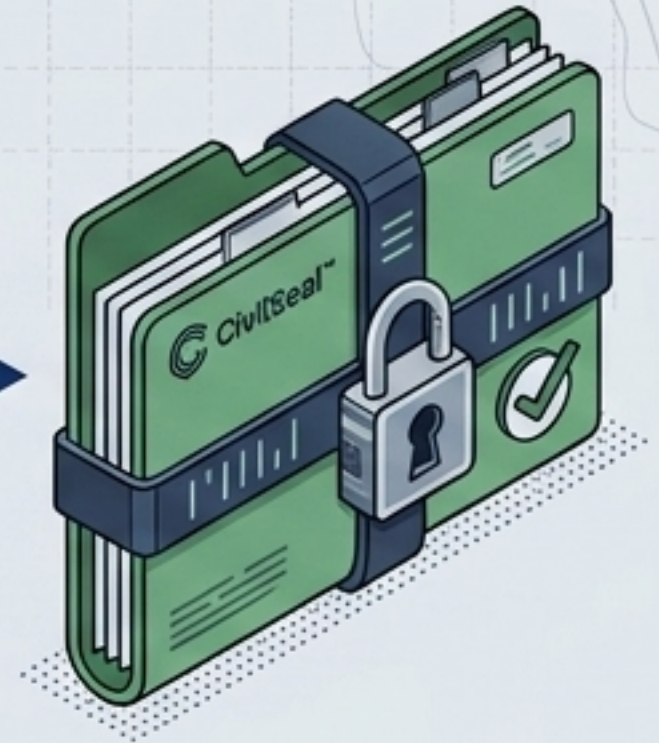

Step 2: Digital Fingerprinting.

The system instantly locks in Timestamp Validation, Device Verification, and Cryptographic Hashing.

Step 3: Chain-of-Custody Tracking.

A mathematically unbreakable log of the asset's lifecycle is generated.

Step 4: The CivilSeal™ Package.

A trusted evidence package containing asset inventory, submission history, and verification data, ready for internal review or law enforcement handover.

Post-Mortem: The 2026 Playoff Run Results

Scale: 4,250 Registered Participants generating 8,742 verified submissions across 25 games.

Speed: 4.7 Minute average time from submission to officer notification.

Impact:
28% reduction in response time vs. 2024 playoffs.
17 critical incidents prevented or de-escalated.
1,126 actionable, validated incidents confirmed.

Bottom Line:
100% of games supported with real-time civilian intelligence.

EXECUTIVE SUMMARY

During the 2026 NBA Playoffs, CivilCam AI provided real time situational awareness, crowdsourced intelligence, and verified incidents to support the safety and security of fans, players, staff, and the greater RTC community. The platform advanced incident response, reduced response times, and created a validated digital record of events across the entire playoff run.

INCIDENT BREAKDOWN

TOP INSIGHTS

CROWD MANAGEMENT

High density alerts helped NYPD reposition resources in real time, reducing congestion points by 31% compared to 2024.

FASTER RESPONSE

Average time from submission to officer notification was 4.7 minutes, enabling earlier intervention and fewer escalations.

VALIDATED INCIDENTS

99% of validated incidents came from civilian notifications, proving the power of community-driven situational awareness.

FAN EXPERIENCE

No major safety incidents involving players or staff. Post-repairs for fan and more supported throughout the run.

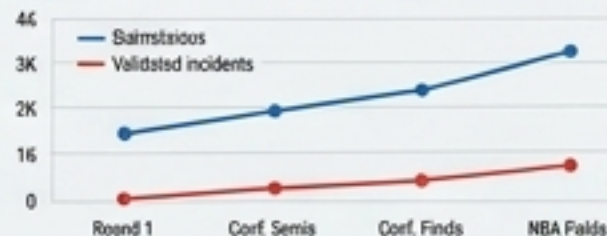

OPERATIONAL EFFICIENCY

28% improvement in overall response time and more deployment time of personnel and resources.

GAME-BY-GAME COVERAGE SUMMARY

ROUND	GAMES	SUBMISSIONS	ALERTS	VALIDATED INCIDENTS
First Round	5	1,642	612	172
Conference Semifinals	5	1,975	701	227
Conference Finals	5	2,193	704	256
NBA Finals	5	3,132	1,121	445
TOTAL	25	8,742	3,218	1,126

SUBMISSIONS & INCIDENTS OVER TIME

NOTABLE OUTCOMES

- Prevented 17 potential escalations through early detection and intervention.
- Recovered \$124,200 in reported stolen items.
- Assisted 130 individuals with reported violations.
- Quoted removed 175 individuals for policy violations.
- Supported seamless collaboration between MSG Security, NYPD, and event staff.

TESTIMONIAL

“CivilCam AI gave us eyes everywhere. The real time insights and validated media helps us keep our fans safe, our players focused, and our city proud. It's a force multiplier for every game.”

– Leon Besa
President, New York Knicks

The Intelligence Trinity

Transforming individual event data into long-term organizational knowledge through predictive crowd modeling and operational benchmarking.

Predictive Historical Intelligence

Threat De-escalation (Safety)

Pinpointing high-traffic risk locations, repeat concern areas, and incident concentration zones.

Flow Optimization (Operations)

Generating data-driven staffing optimizations, entry routing improvements, and concession flow enhancements.

Friction Reduction (Fan Experience)

Identifying wait-time reduction opportunities and venue navigation improvements.

Validated Fan Perspectives

The Future of Venue Security

Imagine every major sporting event creating a continuously improving intelligence network.

Imagine every critical video, image, and observation being organized and preserved with a verifiable chain of custody.

CivilCamAI™

Capture. Validate. Defend.

Turning fan perspectives into trusted event intelligence.
